Subject: Air Analytical Sampling for TPC Port Neches
Attachments: ATT00001.txt

Good morning, Adam.

I hope you have made it home to find all is well and have been able to rest a bit.

CTEH informed us that the lab they have been using and would like to continue to use will be involved in a pre-scheduled week-long audit. They are proposing to provide data summaries once per week for air and asbestos sampling.

First, is that acceptable at this point in the response?

Second, we will have tables in the Community Air Monitoring Section that will only change weekly. Would it be acceptable to leave the tables there and state the next update will be on 12/23?

Thank you for your consideration and guidance.

Becky
